

Raghavendra M Devale

Bengaluru, Karnataka, India

raghavendradevale07@gmail.com | +91 7676500120 | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Professional Summary

Software Engineer skilled in Java and Python, with a track record of building backend services, REST APIs, and full-stack web applications end-to-end using Spring Boot, FastAPI, Angular, and PostgreSQL/MySQL. Solid grounding in Object-Oriented Design, Data Structures & Algorithms, DBMS, and the full SDLC, with a habit of owning features from design through production debugging. Comfortable on Unix/Linux, and building hands-on depth in Docker.

Core Skills

Languages: Java, Python, SQL, JavaScript, TypeScript

Backend: Spring Boot, FastAPI, REST APIs, Spring Data JPA, Spring Security, Microservices Concepts

Frontend: Angular, HTML, CSS

Databases: PostgreSQL, MySQL, SQLite

Platforms & Tools: Unix/Linux, Git, GitHub, Docker (in progress), Maven, Swagger/OpenAPI, Postman, IntelliJ IDEA, VS Code

Core Concepts: OOP, Data Structures & Algorithms, DBMS, SDLC, REST Architecture, Software Design Principles

Experience

Software Developer Trainee

Nov 2025 – Present

DFive Technologies Pvt. Ltd., Bengaluru

- Design, build, and maintain backend services and REST APIs in Java and Spring Boot powering core business workflows, with PostgreSQL/MySQL persistence and query optimization.
- Develop and integrate Angular modules with backend services, owning features end-to-end from API design to UI delivery.
- Secured the application with session-based authentication (HttpSession, secure cookies) for web and Firebase token-based authentication for mobile, applying secure coding practices around credential handling.
- Diagnose and resolve production issues with fixes built for long-term stability, and support an internal Python/FastAPI-based retrieval and document-search application.

Technical Apprentice

Nov 2021 – Nov 2022

Bharat Electronics Limited (BEL), Bengaluru

- Supported documentation and testing workflows using IBM Rational ALM tools for requirement management and test tracking in a structured, process-driven environment.

Projects

Job Platform – Full-Stack Web Application

[GitHub: job-platform](#)

Java, Spring Boot, FastAPI, Angular, PostgreSQL

- Architected a full-stack job platform (Spring Boot backend, FastAPI AI service, Angular frontend) with a layered, decoupled architecture, delivering complete features from job listings through applications.

Knowledge Mesh AI – Document Search Tool

[GitHub: knowledge-mesh-ai](#)

Python, FastAPI, PostgreSQL, Angular

- Engineered a retrieval-augmented document search platform from scratch, with hybrid semantic + keyword retrieval, a factory pattern for pluggable LLM integration, and PostgreSQL/pgvector-backed similarity search behind a FastAPI service and Angular UI.

Prep-Smart – Placement Preparation Portal

[GitHub: Prep-Smart](#)

Python, Flask, SQLite | Team Lead

- Led a 4-member team end-to-end on a placement-prep portal, driving feature scope and cross-functional integration while building backend routes and SQLite data models for student management and progress tracking.

Education

Bachelor of Engineering in Computer Science and Engineering

May 2025

S J M Institute of Technology, Chitradurga

CGPA: 8.66 / 10

Diploma in Computer Science and Engineering

Nov 2021

D R R Government Polytechnic, Davangere

Percentage: 60%

Certifications

- Postman Student Expert – Postman Academy
- Introduction to SQL – Simplilearn
- Java Spring Framework, Spring Boot, Spring AI – Udemy
- AI Fluency: Framework & Foundations – Anthropic ([verify](#))
- Claude 101 – Anthropic ([verify](#))
